

IN THE SPECIFICATION

Please amend the specification as follows:

Please replace the first paragraph after the “Description of the Invention” heading, on page 3 of the specification, with the following paragraph:

The invention includes a novel human immortalized cell line for the purpose of propagating, harvesting and producing virus. PER.C6 cells (*see, e.g.*, U. S. Patent 5,994,128 to Bout et al., also deposited under No. 96022940 at the European Collection of Animal Cell Cultures at the Centre for Applied Microbiology and Research) were generated by transfection of primary human embryonic retina cells using a plasmid that contained the adenovirus (“Ad”) serotype 5 (Ad5) E1A- and E1B-coding sequences (Ad5 nucleotides 459-3510) (SEQ ID NO: 1) under the control of the human phosphoglycerate kinase (PGK) promoter

Please insert the paper copy of the sequence listing (Appendix A) on a new page following the Abstract.
